ABOUT ASSAYVECTOR

- A high-tech biotechnology company founded by senior immunology experts and overseas researchers.
- Our extensive portfolio is based on the strengths of our proprietary technology platforms and we provide a broad pipeline of research products.

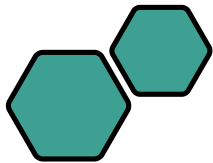

ASSAYVECTOR BIOTECHNOLOGY

PRODUCT FOR
RESEARCH USE

CUSTOMIZED
SERVICES

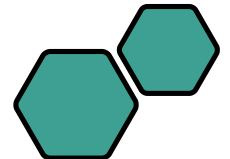

RESEARCH
AREAS COVERED

- ◆ Cancer
- ◆ Immunology
- ◆ Cell biology
- ◆ Signaling transduction
- ◆ Neuroscience
- ◆ Cardiovascular
- ◆ Developmental biology
- ◆ Epigenetics and nuclear signaling
- ◆ Metabolism
- ◆ Microbiology
- ◆ Stem cells
- ◆ Tags and cell markers

OUR
RECOMMENDED
PRODUCT

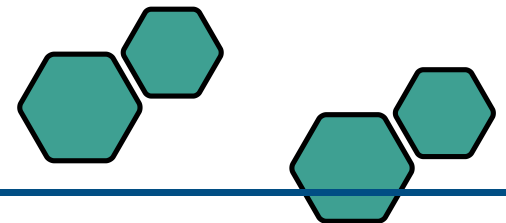

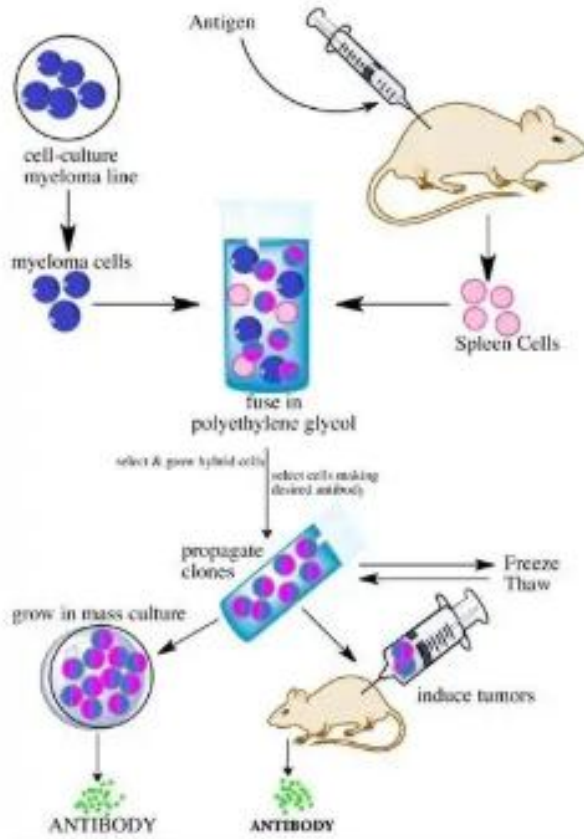

Recombinant Rabbit Monoclonal Antibodies

Numerous RabMAb have been widely used for various applications in life science research IHC, WB, IP and FCM. RabMAb has proven to be an excellent reagent in immunohistochemistry (IHC) and performs extremely well in detecting post-translational modifications of proteins, such as phosphorylation and activation. In addition, a number of RabMAbs have been developed for the detection of biomarkers in targeted cancer therapies. The demand for rabbit monoclonal antibodies in scientific research is increasing day by day, so it is especially important to provide high-quality rabbit monoclonal antibody products.

AssayVector offers 2100 Recombinant Rabbit Monoclonal Antibodies

- ◆ Broader antibody repertoire
- ◆ Simpler immunoglobulin structure
- ◆ Higher specificity and affinity
- ◆ Easy humanization
- ◆ High quality monoclonal antibody drug candidates

Recombinant Protein

7000+ High quality proteins from our proprietary technology platforms

OUR
RECOMMENDED
PRODUCT

- ◆ Peptide synthesis
- ◆ Small-molecule modification
- ◆ Natural protein extraction
- ◆ Recombinant protein expression and purification

CUSTOMIZED
SERVICE

◆ Protein Expression Services

- Prokaryotic Protein Expression Service
- Mammalian Cell Protein Expression Service
- Stable cell line construction Service
- Yeast expression system Service
- Insect Expression System Services

◆ Custom Monoclonal Antibody

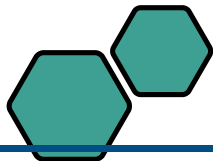

- Rabbit Custom Monoclonal Antibody
- Mouse Custom Monoclonal Antibody

◆ Custom Polyclonal Antibody

- Custom Polyclonal Antibody
- Custom Phospho-specific Antibody
- Custom Small Molecule Antibody
- Animal Immunopurification

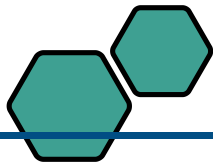

◆ Peptide Synthesis

◆ Recombinant Antibody Expression Service

OUR MISSION

- Our products and services help researchers accelerate their life science research. Our products include Recombinant proteins, Natural proteins, Mouse monoclonal antibodies, Rabbit monoclonal antibodies, Rabbit polyclonal antibodies, ELISA kits and related customised services, covering more than 20 species. We are working on develop more and more qualified products for our researchers.

100% Sales guarantee

OUR SALES GUARANTEE

Our technical team is dedicated to quality-control testing. It ensures all our proteins, antibodies and kits are reliable with lot consistency. In addition, each lot of every product goes through rigorous quality-control testing and multi-assay validation for consistent and quality results.

Thank you
